DETAILED ACTION

Response to Arguments

Regarding Claim 2, applicant's arguments filed 3/03/2006 have been fully considered but they are not persuasive. Lim et al. disclose a thin film transistor array substrate for liquid crystal display and a method for fabricating the same where in Fig. 9, two storage capacitors "M" and "N" are disposed between gate line 206 and capacitor electrode 216 formed above the gate line 206 where the gate line 206 is connected via contact holes 209 and 211 and connecting electrode 219 passing through storage capacitors "M" and "N" to the capacitor electrode 216.

Applicant argues that a single contact hole should pass through the two storage capacitors. However, the term "single contact hole" is not listed in the claim.

Allowable Subject Matter

1. Claims 1, 4-7, 10, 11 and 14-19 allowed.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.
- 3. Claims 2, 3, 8, 9, 12, 13, 20, 21 and 22 rejected under 35 U.S.C. 102(e) as being anticipated by Lim et al. (6,448,579)

Application/Control Number: 10/024,178

Art Unit: 2826

Regarding Claims 2, 12, 13 and 22 Lim et al. disclose a thin film transistor array substrate for liquid crystal display and a method for fabricating the same where in Figs 8 and 9, two storage capacitors "M" and "N" are disposed between gate line 206 and capacitor electrode 216 formed above the gate line 206 where the gate line 206 is connected via contact holes 209 and 211 and connecting electrode 219 passing through storage capacitors "M" and "N" to the transparent conductive tin oxide capacitor electrode 216.

Regarding Claim 3, gate insulation film 214 provided on substrate 201, storage electrode 216 provided on the gate insulation film to overlap the gate line 206 and a protective layer 220 provided between the storage electrode 216 and the capacitor electrode 218.

Regarding Claims 8 and 9, electrode layer 218 acts as both the pixel electrode and the capacitor electrode.

Regarding Claim 20, Fig. 8, shows that gate line 206 is being connected to only one of the two storage capacitor electrodes.

Regarding Claim 21, capacitor electrode 216 is the uppermost electrode.

The applied reference has a common assignee with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 102(e) might be overcome either by a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not the invention "by another," or by an appropriate showing under 37 CFR 1.131.

Conclusion

Application/Control Number: 10/024,178

Art Unit: 2826

4. THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Fazli Erdem whose telephone number is (571) 272-1914. The examiner can normally be reached on M - F 8:00 - 5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Nathan Flynn can be reached on (571) 272-1915. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
